

**12 RESPONSIBLE
CONSUMPTION
AND PRODUCTION**

MAINTAINING SUSTAINABLE PATTERNS OF PRODUCTION AND CONSUMPTION, WHICH ARE ESSENTIAL TO SUSTAINING THE STANDARD OF LIVING FOR BOTH PRESENT AND FUTURE GENERATIONS

Our world has given us an abundance of natural resources. However, we have not used them wisely, and our current consumption exceeds what our planet can give. We must learn how to consume and produce in sustainable ways in order to undo the environmental damage we have caused.

SUSTAINABLE WASTE MANAGEMENT AT UWED

The University of World Economy and Diplomacy has implemented a waste separation system across all its buildings. Separate bins for various types of waste have been installed in all university facilities, enabling students and staff to participate in the process of waste sorting and recycling. This initiative aims to reduce environmental impact and promote eco-awareness within the university community.

EMPOWERING STUDENTS FOR ENVIRONMENTAL ACTION AND COMMUNITY BUILDING

UWED ECO CLUB is a voluntary student association based at UWED. It operates on and outside the UWED premises. The club's goals are:

Promotion of eco-awareness among people (primarily students)

Organization and participation in various eco-campaigns (from planting trees, cleaning green areas, collecting plastic, to holding conferences and round tables with experts in this field)

Uniting with students from all universities and creating an entire eco-community.

Help club members implement their new projects.

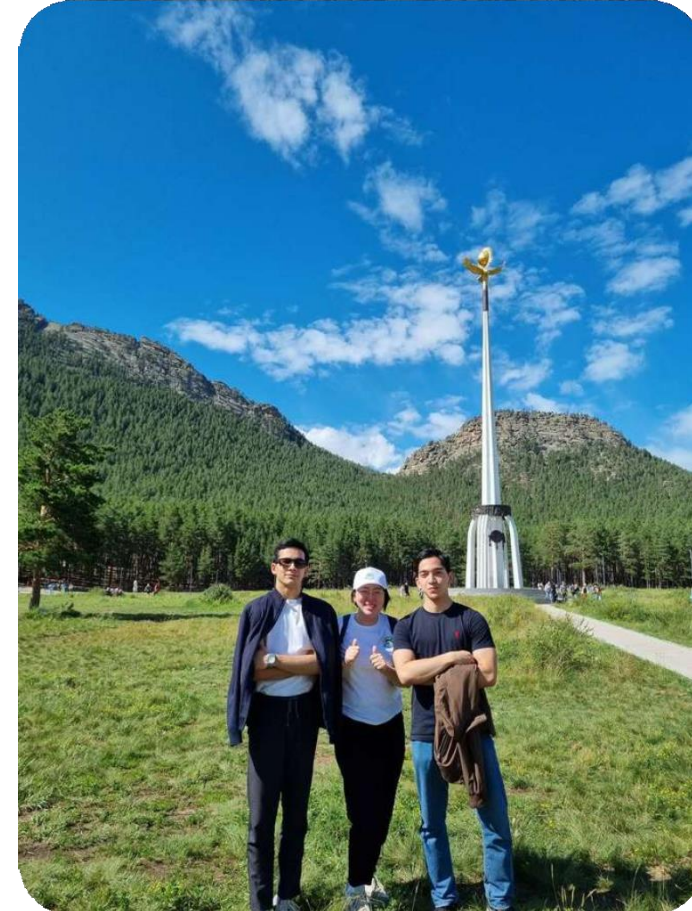

STRENGTHENING UWED ECOCLUB INITIATIVES AND INTERNATIONAL ENGAGEMENT IN WATER DIPLOMACY

ON MARCH 6, 2024, A MEETING OF UWED ECOCLUB ACTIVISTS WAS HELD TOGETHER WITH THE FIRST VICE-RECTOR FOR WORK WITH YOUTH AND SPIRITUAL AND EDUCATIONAL AFFAIRS ODIL ABDUGAFUROVICH YUSUPJANOV AND THE CHAIRMAN OF THE YOUTH UNION. AT THE MEETING, THE RENEWAL OF THE ECOCLUB ACTIVITIES, ITS COMPOSITION AND PLANNED ACTIVITIES FOR THE CURRENT ACADEMIC YEAR WERE DISCUSSED.

PARTICIPANTS ALSO TOOK PART IN THE TRAINING PROGRAM "WATER DIPLOMACY" IN KAZAKHSTAN.

PROMOTION OF ECO-AWARENESS

UWED ECO CLUB is a voluntary student organization based at UWED. It operates both on and off campus. The club's goals are:

- Promoting eco-awareness among people (primarily among students).
- Organizing and participating in various eco-initiatives (ranging from tree planting, cleaning green areas, collecting plastic, to hosting conferences and roundtables with experts in the field).
- Uniting with students from all universities to create a whole eco-community.
- Helping club members implement their new projects.

IN SEPTEMBER 2023, AN ENVIRONMENTAL COMPETITION ON WASTE COLLECTION WAS HELD BY COCA-COLA COMPANY IN TASHKENT CITY

YOSHLAR ISHLARI AGENTLIGI

Universitetlararo Navro'z bayramini nishonlash doirasida **#PET2NatureUz** eko-chellenji o'tkazilmoqda

16 martdan 26-maygacha

Orolbo'yi Ustyurt platosining ekotizimini asrab qolish uchun plastik yig'

Competition

UWED STUDENTS WON FIRST PLACE IN THE ENVIRONMENTAL COMPETITION AND WERE GIFTED SOUVENIRS AND A BENCH MADE FROM RECYCLED WASTE BY COCA-COLA

UWED OFTEN HOLDS INTERNATIONAL ENVIRONMENTAL CONFERENCES AND ROUNDTABLES

- On February 6 of this year, a roundtable discussion on the topic "Youth, Ecology, and Legislation" was held at the University of World Economy and Diplomacy. The event was attended by U. Yusupov, Deputy Chairman of the Executive Committee of the Central Council of the Ecological Party of Uzbekistan; O. Yusufjonov, UWED's First Vice-Rector for Youth Affairs and Spiritual-Educational Work; as well as students and tutors.
- During the roundtable, U. Yusupov emphasized the importance of youth involvement in addressing environmental issues in our country, including improving the ecological environment, combating increasing water scarcity, resolving waste problems, enhancing air quality, expanding forests, and establishing green belts in densely populated cities.
- Students and tutors actively participated in the event, sharing their opinions and asking questions of interest. At the end of the event, it was agreed to intensify the activities of the UWED Eco Club

ARTICLES REGARDING ENVIRONMENTAL ISSUES WRITTEN BY UWED SCHOLARS

The global food problem described aligns closely with SDG 12: Responsible Consumption and Production, which emphasises sustainable management of resources to reduce waste, improve efficiency, and ensure long-term food security.

Chronic hunger and localised famines are often exacerbated by unsustainable agricultural practices, over-exploitation of land, and inefficient food systems that contribute to food shortages and waste. Climate change and natural disasters further threaten agricultural output, highlighting the need for sustainable production practices to build resilient food systems.

Additionally, instability in supply chains, political unrest, and mismanagement of resources underline the importance of developing sustainable consumption patterns and reducing food loss and waste along the supply chain. Addressing global hunger through responsible consumption and production not only minimises environmental impact but also ensures equitable access to food, preventing shortages and undernourishment.

By promoting sustainable agricultural practices, reducing waste, and fostering collaboration among stakeholders, SDG 12 provides a framework to combat hunger while preserving resources for future generations. UWED researchers are doing their best to be part of the solution.
