BIODIVERSITY**

Our existence on our planet is based on a thriving terrestrial life. Because of deforestation, habitat loss, and land degradation, humans have seriously harmed the planet's ecosystem, of which we are all a part. Preserving biodiversity and encouraging a sustainable use of our ecosystems are not causes. It is essential to our own existence.

UWED STUDENT'S LEAD CLEANUP EFFORT FOR INTERNATIONAL EARTH DAY

In alignment with International Earth Day on April 22, students of the University of World Economy and Diplomacy spearheaded the "We are for the Cleanliness of the Botanical Garden!" initiative in Tashkent's Botanical Garden. They were joined by participants from other universities, schools, and environmentally conscious citizens from across Tashkent, underscoring a community-wide commitment to environmental stewardship.

International Earth Day, proclaimed by the United

Nations General Assembly, serves as a global call to acknowledge and foster the symbiotic relationship between human activities and Earth's ecosystems. Celebrated worldwide, the day prompts community-driven actions such as cleanups and tree plantings, emphasizing the collective responsibility we hold towards preserving our planet.

This year, UWED students and the broader community undertook the task of cleaning the Botanical Garden, reinforcing the message of unity in environmental preservation. The event not only facilitated the beautification and maintenance of a vital green space but also highlighted the importance of collaborative efforts in safeguarding our natural resources. Participants left with a renewed sense of responsibility for the environment, ready to continue making positive changes in their local areas.

Information: The Botanical Garden has more than 4,500 species of trees, flowers, and other plants. There are several landscape zones here, reflecting the diversity of the flora of Central and East Asia, North America and Europe, the Caucasus, and the Far East.

Within the framework of the “Yashil Makon” national project, the students and professors of the University of World Economy and Diplomacy, as well as the staff of JIDU, took an active part in the Tree Planting Marathon among the higher educational institutions of the Republic.

Improvement works were carried out on the territory of JIDU and 100 seedlings were planted
